

Insurance

TomTom shows the way to faster and more accurate risk assessment

Insurance

Whether your business provides insurance for property, injury, life, health or automotive, highly accurate mapping is a vital business tool. Equally important is flexibility. TomTom maps have the ability to layer precise traffic data, pinpoint addresses and track census information which offers the potential to revolutionise your efficiency and profitability. Let us drive your business forward.

BENEFITS

Risk assessment

Reduce exposure by utilizing our rich road, traffic and census information

Future Proof

Predict changes in customer needs with real time and historical data

Cost Savings

Increase profitability through more accurate quotations

Marketing & advertising

Boost marketing efficiency based on desired risk profile

Customer satisfaction

Adjust estimates with the latest mapping tools

Products

TomTom delivers a comprehensive range of high quality maps, route and traffic information to help manage public assets:

High Quality Digital Maps - provide the richest, freshest and most accurate global road network database. They integrate turn by-turn directions, road data including signage and intersections to get your business moving quickly and efficiently.

Post - drives enterprise efficiency with cartographic representations for postal codes in the United States and Canada. It extends the functionality of MultiNet by providing detailed point and boundary representations of postal districts, linking to municipal coverage and providing for additional analytical capabilities.

Custom Travel Times and **Custom Area Analysis** - These historical traffic products reveal the risks travellers face every day. Choose a specific route or area and they analyse the traffic information at any day or even hour of the year. Understand road usage in extreme weather conditions, when school lets out, and even the impact of holidays.

Administrative Areas - offers commercial grade boundaries of municipal and census defined geographic divisions in the United States and Canada. Changes are tracked for shifting political boundaries to accurately steer analysis and key strategic initiatives.

20 years of innovation and geospatial expertise available to the Insurance Sector

We are a map making company with over 20 years' expertise. Continuous investment and over 2,000 persons help us provide the freshest and most accurate maps with best-in-class safety and attributed navigation.

Our unique 'hybrid' map-making delivers content of certified quality. We use an innovative approach which combines traditional sources such as satellite imagery, field surveys, mobile mapping vans and fleets with rigorously controlled community input.

Consequently TomTom has delivered industry leading traffic information to governments, enterprises and consumers since 2006. The following key assets will prove invaluable to your projects:

An exceptionally large number of live (community) input sources:

- Millions of connected GPS devices + 80 million GSM probes + millions of government road sensors + thousands of journalists collecting incident information.
- This large number of data sources leads to greater accuracy, increased confidence in data from our users as well as a better customer experience.

Ability to publish data on any road:

- Thanks to our OpenLR technology, TomTom can describe incidents or congestion on any road on any map, including secondary roads.

Mature and proven fusion engine:

- Class leading traffic information.

Frequency of data:

- Every second new road data is received
- Every 30 seconds the traffic status is updated
- Every minute (or less) all data is made available to our customers
